JOB MARKET PAPER

["Insiders v. outsiders: Market creditor protection, finance and investment"](#)

Abstract: Market-based lending plays a key role in credit intermediation. But protection of dispersed market creditors disciplines management at the risk of complicating debt restructuring. In theory, such protection has ambiguous but possibly sizable consequences for firms' financing and investment. I estimate effects of a US court ruling which protected bond market creditors against coercive exchange offers: After the ruling, distressed firms were forced to restructure bond market debt in bankruptcy more frequently. Healthy firms responded by cutting bond issuance and investment. Direction and magnitude of reactions indicate that over-protecting dispersed creditors can choke public credit markets, with adverse real effects.

OTHER WORKING PAPERS

Niall Ferguson, Martin Kornejew, Paul Schmelzing and Moritz Schularick (2023). ["The safety net: Central bank balance sheets and financial crises, 1587-2020"](#). CEPR Discussion Paper 17858.
